HOW WE USED COPILOT TO BUILD A GRADE 3 & 6 EQAO PRACTICE TOOL

A quick overview of our process and lessons learned

THE INSTRUCTIONAL PROBLEM

- Needed simple, engaging, and offline math practice resources that students could access independently without requiring constant internet connectivity.

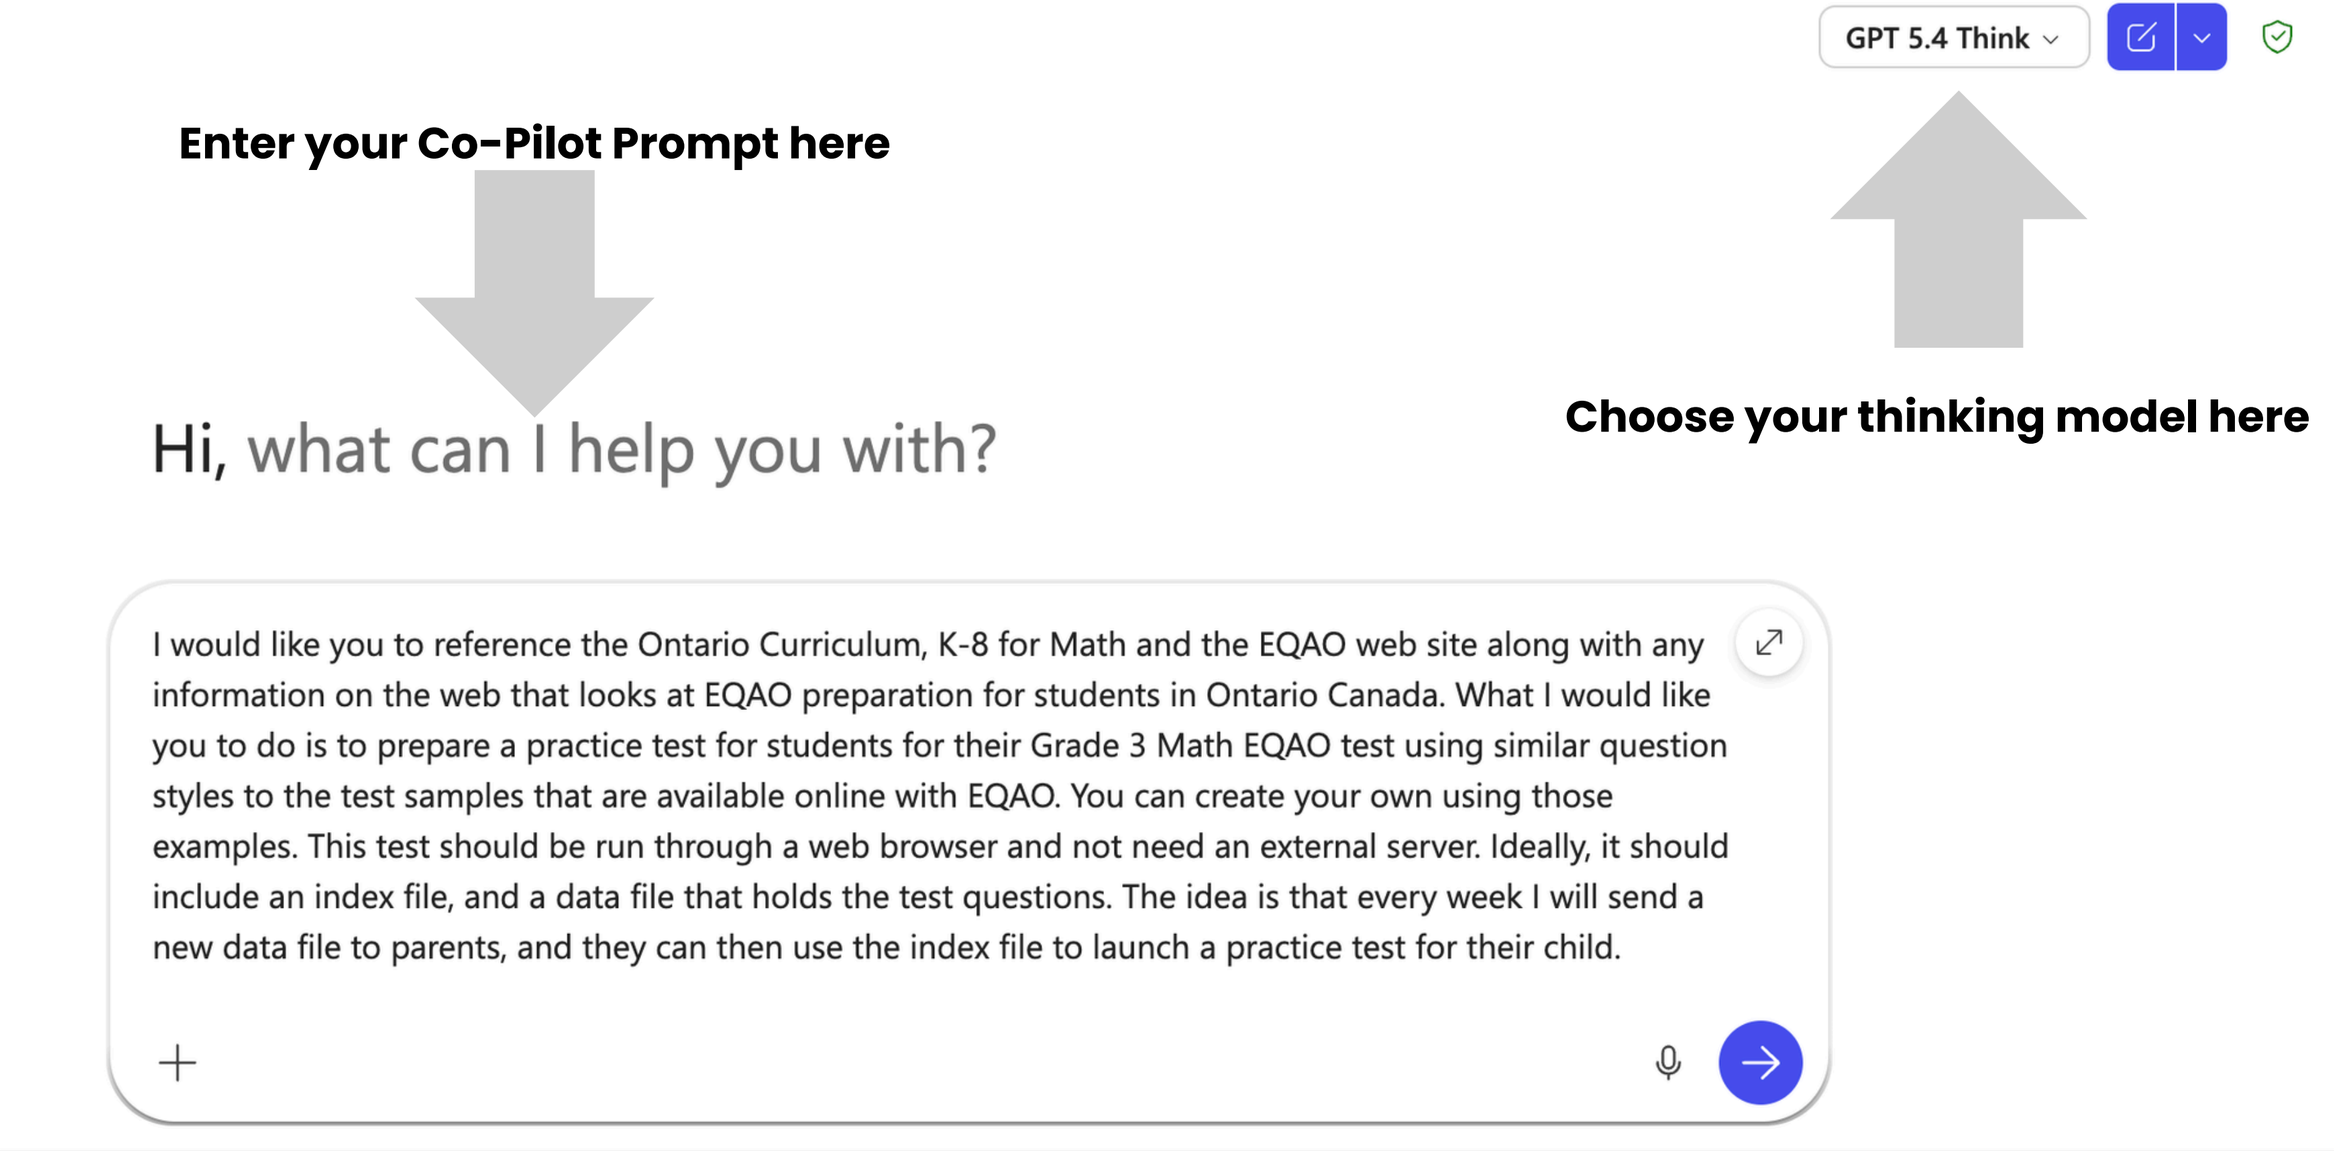
- Aimed to support math achievement while significantly reducing teacher preparation time, allowing educators to focus more on direct instruction and student support.

THE ORIGINAL PROMPT

- Prompt asked for an offline Grade 3 EQAO-style math practice site with multiple tests, clean design, and clear feedback for students. This will also work for Grade 6.

- Required student-friendly interface that works without internet connection, organized by Ontario math achievement categories with instant scoring.

PROMPT:



GPT 5.4 Think
Enter your Co-Pilot Prompt here
Choose your thinking model here
Hi, what can I help you with?
I would like you to reference the Ontario Curriculum, K-8 for Math and the EQAO web site along with any information on the web that looks at EQAO preparation for students in Ontario Canada. What I would like you to do is to prepare a practice test for students for their Grade 3 Math EQAO test using similar question styles to the test samples that are available online with EQAO. You can create your own using those examples. This test should be run through a web browser and not need an external server. Ideally, it should include an index file, and a data file that holds the test questions. The idea is that every week I will send a new data file to parents, and they can then use the index file to launch a practice test for their child.

METHOD

Copilot produced a functional first version quickly, generating an offline Grade 3 EQAO-style math practice site with a test and a clean design.

The team refined the structure, design, and wording through collaborative review, ensuring alignment with Ontario math achievement categories.

Focused on making the tool student-ready with a clean interface, instant feedback, and accessible navigation for Grade 3 learners.

WHAT THE FINISHED FILE DOES

Clean, student-friendly interface that works completely offline, allowing students to practice anytime without internet connectivity. Includes multiple tests covering various math concepts.

Provides instant feedback on answers so students can learn from mistakes immediately. All content is organized by Ontario math achievement categories for targeted practice.

Question Set

Grade 3 Math EQAO-Style Practice – Week 1

Progress

0 of 18 answered

Questions	Time guide	Strands
18	35 min	5

Jump to a question

1	2	3	4	5
6	7	8	9	10
11	12	13	14	15
16	17	18		

Weekly use

Keep `index.html` in the same folder.
Each week, replace only `questions.js`.

Grade 3 • Math • Practice

Fun, clear, and EQAO-style.

This practice set uses original questions inspired by Ontario Grade 3 math expectations and common online EQAO-style formats. It works fully offline in a browser and does not need a server.

How to use

Works offline. No sign-in. Your best scores are saved on this device.

Built for offline practice. Questions are original and aligned to Ontario Mathematics achievement chart categories (Knowledge & Understanding, Thinking, Communication, Application).

WHY WE CREATED IT

This tool provides meaningful Grade 3 and 6 math practice that is accessible and motivating for students. It simplifies preparation for staff while ensuring students get the targeted practice they need to succeed.

CLEAR PURPOSE = BEST RESULTS

Purpose → Process → Product → Impact
